Partner, Levi & Sinclair, LLP

Canada

*ACFE 2007 Fraud Examiner of the Year*

I use  
**IDEA.**

“One of the key elements of fraud is concealment of the evidence. Our ability to aggressively and completely analyze the data we recover from suspect hard drives using IDEA has made the search for the evidence much easier and more cost effective. Generally, we are searching several years of data, not always knowing what we might find. IDEA’s features such as extraction, sorting, searching, summarizing and comparing data files make it an invaluable tool for the forensic accountant and fraud examiner.”

Levi & Sinclair, LLP is a Montreal based forensic accounting and litigation support firm. The firm has successfully performed these services for clients and lawyers in San Francisco, Austin Texas, Freeport Bahamas, St Kitts and Nevis, Haiti, Boston, Ottawa, Vancouver, Denver, New York, Philadelphia, Houston and Toronto. Highly trained staff members are licensed world-wide to perform investigative and forensic audits and have achieved international recognition for their innovations particularly in the field of computer forensics.

IDEA can read, display, analyze, manipulate, sample or extract from data files from almost any source. Lower your audit cost, add more quality to your work and meet professional standards.

Be a better auditor.  
You have the knowledge.  
We have the tools.
